**ONE STOP SOLUTION FOR
HIGH PRECISION MOULDS AND DIES**

Firoj Nasir Mundhe
Director

Jayesh Rajan Marat
Director

The MICRO-TECH Mould manufacturer & exporters is one of the leading mould making company in India.

We specialize in the manufacture and assembly of high-quality precision Moulds. Our company continues to serve customers in PVC Pipe fitting, Cap & closers, Consumer & Engineering Industries.

MICRO-TECH has a reputation for manufacturing quality, efficient moulds with high production stability. Our aim is to establish a close working relationship with all our customers. Therefore we recognise the need for a high level of service which most importantly includes, meeting tight deadlines and delivering quality products at competitive prices.

We are committed to integrating lean manufacturing into every process. It is our business to embrace change and fully commit ourselves to successfully taking on the challenges of tomorrow today.

Our know-how combined with our numerous years of experience allows us to work closely with our customers and vendors to provide timely delivery of detailed precision parts to meet the customer's every specification.

QUALITY

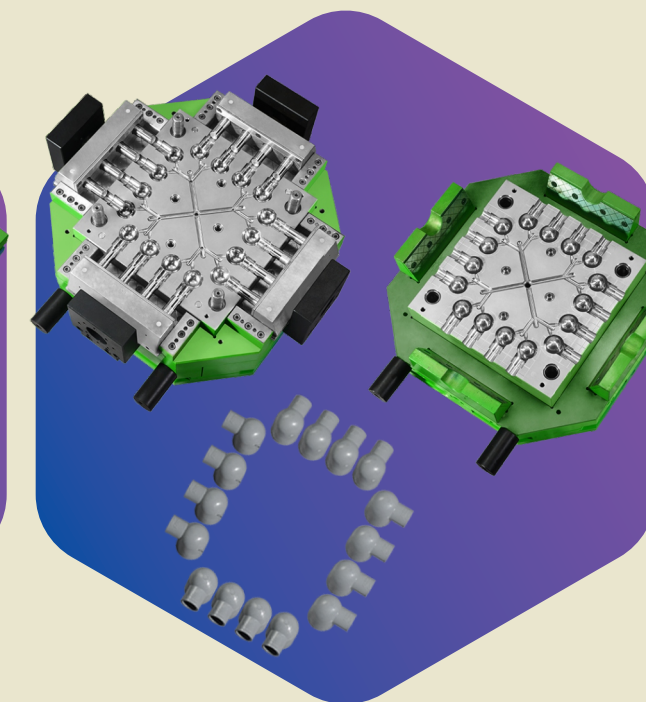

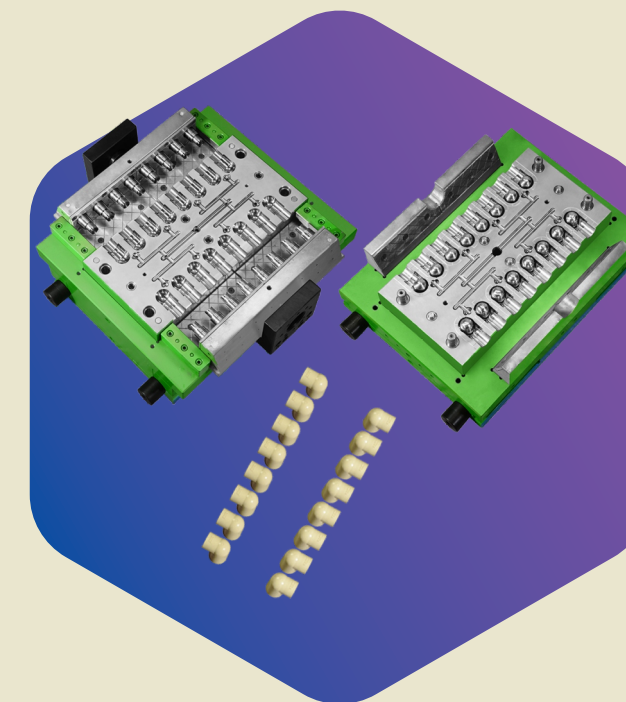

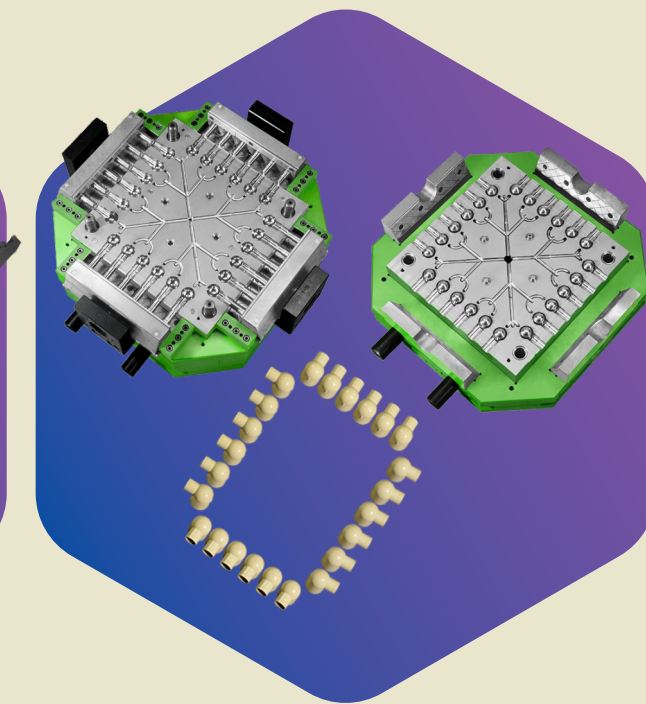

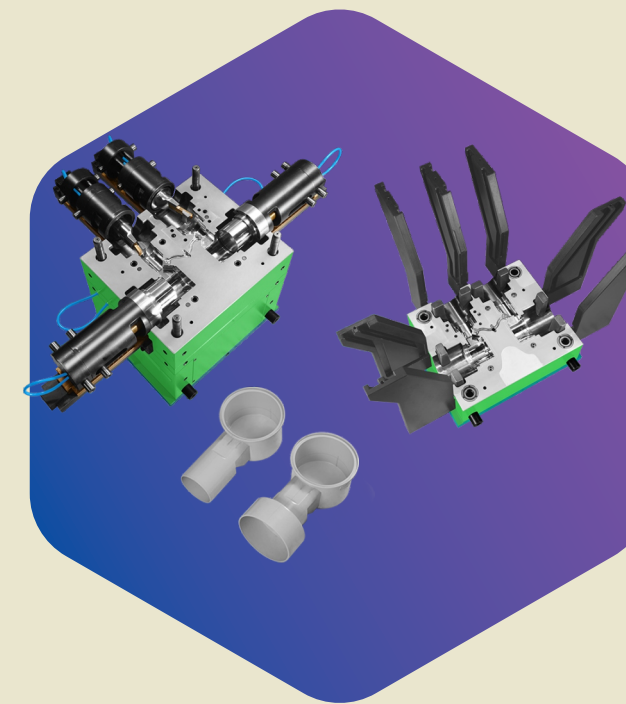

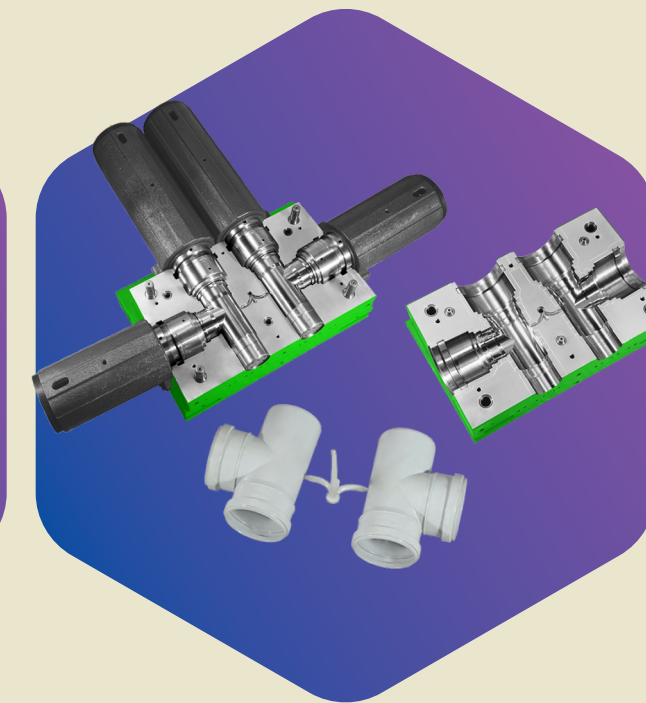

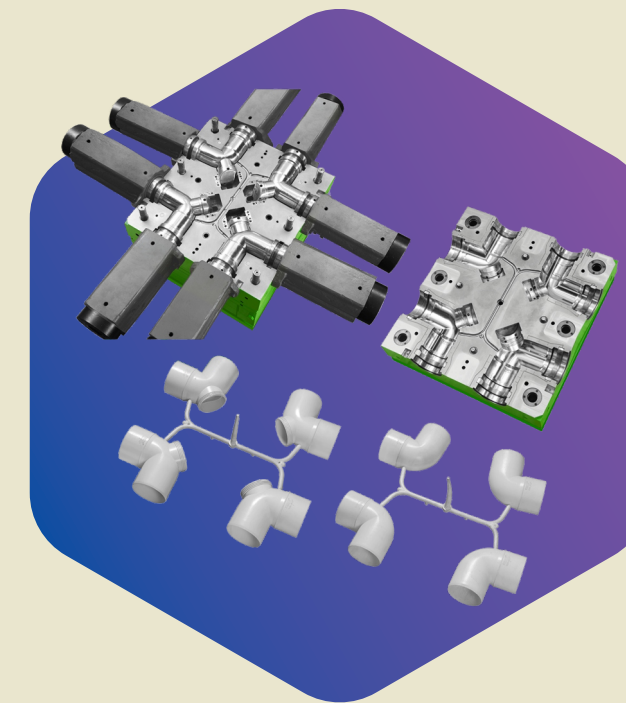

Micro-Tech staff is trained to meet and exceed our client's requirements. Quality standards are uncompromising and Micro-Tech is in the process of achieving ISO 9001 certification. Our staff utilizes only the highest quality and state-of-the-art precision machining and inspection equipment. Our equipment and machinery follow strict calibration and inspection standards so we continue to exceed our client quality standards.

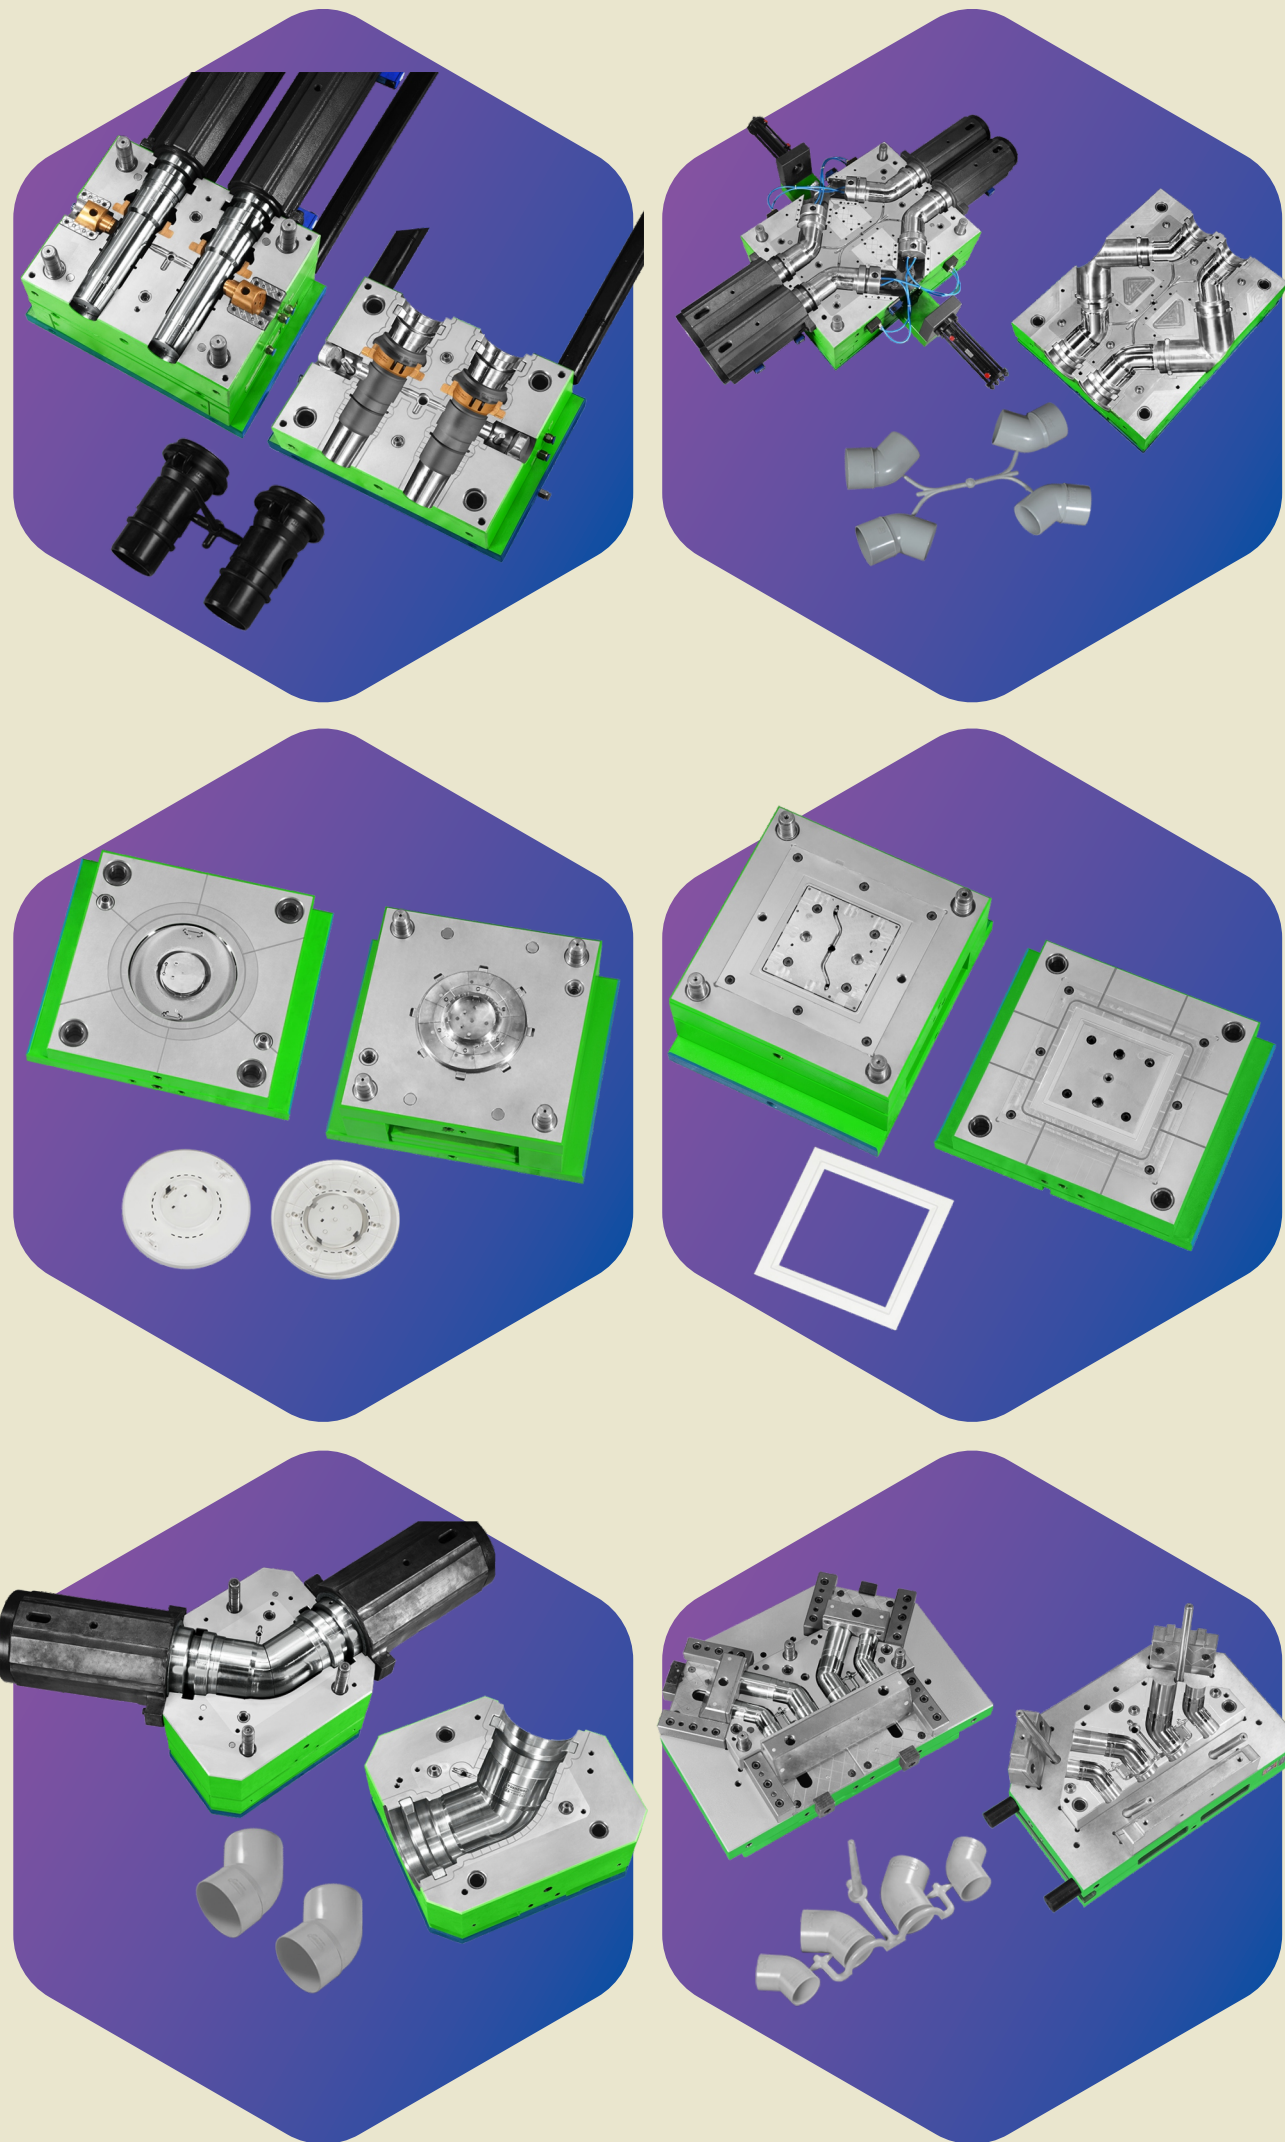

We are proud to say that our commitment to providing quality moulds and sales service has resulted in many satisfied customers. Dedication to quality and an ability to produce right the first time is a tribute at Micro-Tech's dedicated workforce. Micro-Tech operates an internal Quality Assurance System in line with ISO standards but more importantly in line with statutory requirements.

MANUFACTURING FACILITIES

Micro-Tech is dedicated to maintaining their established position on the forefront of machining technology. The company has done this through the acquisition of the latest in CNC multi-tasking and high-speed machining equipment which enables us to bypass multiple setups, handling costs and defective parts. The immediate benefit to our customer is compressed lead times and significant reduction in cost.

DESIGN & DEVELOPMENT

To implement the innovative design thoughts, we use high end softwares like Creo Parametric and Mastercam 9.1. This helps us in ensuring and achieving a superior final product.

AFTER SALES SERVICE

Our expert technicians are always ready to provide you the door step service for any type of Injection mould made by us.
